FIRECLAY APRON FRONT SINK

Why Fireclay? Fireclay is a mixture made of clay and minerals, heated to an extremely high temperature, molded, glazed and fired and high temperatures, which causes the clay and glaze to fuse together and makes for one of the most durable sinks. This clay is only found in certain regions of the world, making its mixture more expensive to produce. Fireclay sinks will be heavier and more dense. Typically 20 pounds heavier. Due to its composition, a fire clay sink is more difficult to chip.

- Without faucet hole or overflow
- Reversible design for the traditional or ornamental front.
- Special Order Product: Ships within 1-2 weeks

See website for detailed measurement information.

This farm sink is handmade, therefore dimensions may vary. It's recommended to use the actual sink that you will be installed in order to best determine the cutout dimensions for your base cabinet and countertop.

PORCELAIN **APRON** **FRONT** SINK

The rectangular porcelain farmhouse large single bowl sink offers a rich elegant appearance that works well in both traditional and contemporary kitchen designs. The porcelain farmhouse sink has a clean straight apron, a 10" deep basin with tight radius corners and straight sidewalls for easy cleaning. The porcelain is durable, easy to maintain and will preserve its glossy appearance.

- Without faucet hole or overflow
- Reversible design for the traditional or ornamental front.
